

Water and Sewer Committee Meeting

April 3<sup>rd</sup>, 2019

8:00 AM

Village Town Hall

**Council Members:**

1. Paula Ladd
  
2. Jeff Koehler
  
3. Michael McCann

**Public:**

Jaime Mendoza, Anne Auger, Mike Mewhorter, Jessica Dress, Tip Boyles, Judy Berry, Larry Knaser

**Discussion:**

**Council members asked questions about advantages/disadvantages of low-pressure sewer system rather than forced gravity feed with concern about Village vs. Homeowner responsibility for maintenance.**

**Mewhorter states in his opinion that there is plenty of room for general expansion of wastewater system in processing end.**

**Areas of low gravity may be ideal because of lift station flooding problems; otherwise would include Toledo and Seven Gables where its being considered. Also could consider Ibis and Sybil.**

**Mendoza clarified that health department rules would require each homeowner on street to tie in within 12 months of availability.**

**Council still needs to draft policy and submit to rest of body for consideration.**
